- 24/7 technical support
- Tools to repair and restore the system
- Multilanguage interface
- Plus much more...

**NEW!**  
**Version 7.5**

# AVG Rescue CD

## A Powerful Toolset for Rescue & Repair of Infected Machines

The AVG Rescue CD is basically a portable variant of AVG based on the Windows PE platform. It is distributed as a bootable CD intended for operating system recovery in such an event where the system cannot be loaded in the regular way – for example due to substantial virus infection. Initially the AVG Rescue CD will load the temporary operating system Windows PE edition and run AVG, which can be then used in the usual way for virus and spyware detection and removal. In addition, administration tools are available for advanced users. The complete list of features can be found below.

### AVG RESCUE CD FEATURES

- 1-year multi node license
- 24/7 technical support via e-mail in English
- Suitable for recovery of Windows XP and Server 2003 operating systems by running AVG from an alternative Windows environment
- Ability to perform a clean boot from CD
- Full antivirus and antispayware scanning of system memory and hard disks
- Ability to update virus and spyware definitions from a local AVG installation, hard drive, directly through Internet-enabled LAN, or an external source (flash drive etc.)
- Multilanguage interface (English/German/Czech)
- Tools to repair and restore the system

### ANTI-VIRUS AND ANTI-SPYWARE SCANNING

The AVG Rescue CD incorporates the full scanning power of AVG Anti-Malware edition, offering extended protection to your personal computer due to the Anti-Virus and the Anti-Spyware component. Enabling you to fully scan and heal infections on your inoperable computer. You can perform full or partial scans of both system memory and hard disks (including archive files such as zip and rar), to remove infections such as viruses, Trojans, worms and spyware. AVG Rescue CD can even detect and remove many potentially unwanted programs that may also be part of the cause of your computer's problems.

### UPDATING VIRUS DEFINITIONS

The AVG Rescue CD allows updating from within the application environment via many sources including the Internet, external USB drives, and the existing definition files (if AVG is already installed on the computer).

### AVG RESCUE CD TOOLS

- AVG Command Line utility providing full command line access.
- freeCommander – two panel file manager intended for more experienced users.
- Map network drive utility to quickly and easily map a network drive.
- AVG Registry editor tool for system registry processing.
- AVG IP Config tool for managing network settings.
- AVG Ping utility for testing the availability of network resources (servers, domains, IP addresses).

- AVG Scan disk tool for analyzing and testing hard disk integrity with optional automatic error correction.
- Simple AVG Notepad utility for saving notes, editing system files etc.

### MINIMUM REQUIREMENTS

The AVG Rescue CD provides the user with the possibility to boot-up and access files on a Windows XP or Windows Server 2003 system (using either FAT, FAT32 or NTFS file systems). It is necessary that the computer's BIOS will allow direct booting from the CD, (for correct CD startup) and also that the computer has at least 128 MB of RAM memory installed (256 MB RAM is highly recommended). Finally, a CD-ROM or compatible device must be installed in the computer.

### LICENSING

The AVG Rescue CD is a 1-year multi node license. A single user may administer multiple computers but only one at a time.

### TECHNICAL SUPPORT

With AVG Rescue CD, technical support is available 24 hours a day, 7 days a week, via e-mail. The Grisoft support staff provides expert consultation with rapid response times. AVG Authorized Resellers are also available to assist you with sales and technical questions. Registration of your AVG Rescue CD License number is necessary for user identification in order to receive technical support.
